

Penstemon 'Riding Hood'® Red®

Penstemon 'Riding Hood'® Red®

Red Riding Hood has good basal branching and thick glossy leaves. This striking novelty offers a superb garden and container performance. It has a deep red perpetual flowering all summer and a scarlet bell shaped flower covers the slender stems. It can be left in bed for garden décor or used as cut flower.

Final garden height is 60cm/24". We recommend selling in 1L\quart during bedding plant season or right after it. Potting takes place from July through January. Red Riding Hood is hardy USDA 5 zone and it is also drought tolerant.
