

Peat Free

sustainable coir substrate

- 100% Peat-Free substrate with good drainage and air capacity.
- Following UK growers demand, we introduce our innovative peat free substrate. This product is eco-friendly, alternative to peat free substrates.
- Proven to promote exceptional root establishment and development.
- Plants may initially appear more compact upon arrival, yet they develop remarkably well once potted.

Peat Free Substrate characteristics

Preferred higher nitrogen feeding

Good drainage

Excellent air capacity
