Salicornia Europaea

A fleshy stemmed annual plant with a high salt content, the Salicornia, also knownas glasswort or samphire, just might be the next culinary herb sensation.Eaten raw, quickly fried, steamed or microwaved, this high-protein plant is asurprising addition to salads, soups, hot dishes and a perfect accompaniment forfish & seafood plates.

Natively, the Salicornia is highly adapted to the sea shore and covered by salt waterfor much of the day with the ebb & flow of the tides.We at Hishtil have developed it as a conventional plant rooted in soil andirrigated with regular water. Now, it is suitable for growing outdoors in pots or ingreenhouses, up to 30 cm.

Two weeks before harvesting, it is important to irrigate with brackish water toachieve the ultimate salty taste!

Plant Characteristics

Growth Habit	Upright
Plant Height	30-50 CM
Foliage Color	Green
Fragrance	None

Growing Information

Planting Time	All year round, “day-length” during winter.
Plant Spacing	20 CM
Watering	Medium
Light Exposure	Full Sun
Growing Temp (°C)	10°C (Avg.)

Plant Order Specs

Available As	Conventional
Sales Area	EU,North America – URC Only
Quantity Per Bag	100
Propagation Units	Rooted Cuttings,Unrooted Cuttings
Lead Time	7 Weeks
Tray	153 cells
Pinched RC Plant	No

Recommended Pot Sizes (for retailers)

Recommended Pot Sizes (for retailers)	Weeks	Product Status
1L	8
