Mentha spp. 'Blackcurrant'

There is a hint of Blackcurrant scent over a spearmint base with this beautiful plant, which produces dark green leaveswith a flush of Blackcurrant colour in early growth and a profusion of tasty leaves during the growing season.It is hardy and like most species of the mint family has a spreading habit, so is well suited to being grown in a container.Mentha spp. ‘Blackcurrant’ can be used on summer drinks, tea, ice cream and sorbets.
