

Rosmarinus officinalis 'Capercaillie'

Originating from Scotland, *Rosmarinus officinalis* 'Capercaillie' is a distinct rosemary variety, notable for its half-prostrate growth and dark, vibrant green leaves. It boasts bright blue flowers that bloom extensively during the summer, providing a long foraging season for hummingbirds. This variety maintains a mounding habit. 'Capercaillie' is hardy and well-suited to the Mediterranean climate. Its aromatic, silvery-green leaves enhance culinary dishes with robust flavors. It's both a practical and ornamental choice for gardeners.

Plant Characteristics

USDA Hardiness Zone	8
Plant Height	45 CM CM
Flowering Period	Spring
Flower Color	

Growing Information

Planting Time	Spring Autumn
Watering	Reduced
Light Exposure	Full Sun

Plant Order Specs

Available As	Organic,Conventional
Sales Area	EU,North America
