

Dichondra Argentea 'Silver Falls'

`Silver Falls` is a trailing plant. Its silver stems are covered with very small, rounded, silver leaves. The plant grows up to 5-10cm (2-4") high and spreads to 90-120cm (36-48") wide.

Point of Sale:

This highly heat and drought tolerant plant has very attractive foliage. It is great either as a low-growing groundcover or as a cascading plant in hanging baskets, in raised beds or at the edge of rock walls.
